

DIM-CCT

Bi-color wireless with transmitter

DIM-CCT is a wireless controller for bi-color LED strips. The DIM-CCT set is delivered in a handy box which contains all components for controlling one zone. The 24VDC power supply must be ordered separately based on the necessary capacity. Per extra zone, you need to order one SR-1009 receiver.

The wireless receiver can control up to 480W LED strips on 24VDC. If more capacity is necessary, the installation can simply be extended with an extra receiver in slave mode, thanks to the 2-threaded connector.

- Wireless adjustment of color temperature and dimming
- Range up to 40 meters
- 2-threaded master/slave connector
- Compatible with Smartwifi
- Control up to 4 separate zones or all together
- 3 memory buttons per zone
- Up to 8 transmitters per receiver
- Up to 480W on 24VDC
- Unlimited amount of receivers

Kit for 1 zone:

Article	Description	L	W	H	Gross price
